DEVO 7 with Goebish's Multimodule

Inverted Flight like a CP-heli!!

Download DEVO7 model file

You have to assign the Channels in Bayang.ino (multimodule Arduino-Sketch) to be as follows:

```
packet[2] = GET_FLAG(AUX3, BAYANG_FLAG_FLIP)              //Assignment for
Devo7 + Silverware
              | GET_FLAG(AUX2, BAYANG_FLAG_HEADLESS)
              | GET_FLAG(AUX1, BAYANG_FLAG_RTH)
              | GET_FLAG(AUX6, BAYANG_FLAG_SNAPSHOT)  //Not assigned in
available in DEVO 7
              | GET_FLAG(AUX5, BAYANG_FLAG_VIDEO);
     packet[3] = GET_FLAG(AUX4, BAYANG_FLAG_INVERT)
```

H101 has to be configured as descripted here

DEVO 10

H101 model file for using H101 as a CP-Heli Trainer posted by SirDomsen

Hints for DIY models

watch the config.h section

others coming soon
