Latest news

• Unfortunately, the well known **H8mini** currently is **not flashable anymore**. They changed the board to an incompatible one, it won't be flashable right now, nor in the feature!

• Same thing happened to the **E011** a while back

If you are looking for a quad that can be flashed:

- Beta65S Lite
- E011C "Santa Whoop"
- BWhoop B03 (Pro)
- Stlink with fitting flash wire included
- last but not least, the good, old H8S 3D

If you are looking for a board only:

- BETAFPV Lite Brushed Flight Controller
- BEECORE Lite
- best whoop board: Alienwhoop Zer0
