Latest news

Popular models that are not flashable anymore

- Unfortunately, most **H8mini** are to be considered not flashable anymore. The constructors changed the board multiple times and some of them use completely different hardware, so it is not recommended to buy an H8mini specifically for the purpose of flashing it to Silverware. If you already own one you can take a look at the dedicated page.
- The **E011** is also known to not be flashable anymore

Known models that should be flashable

- Beta65S Lite
- E011C “Santa Whoop”
- BWhoop B03 (Pro)
- last but not least, the good, old H8S 3D

Board only

- BETAFPV Lite Brushed Flight Controller
- BEECORE Lite
