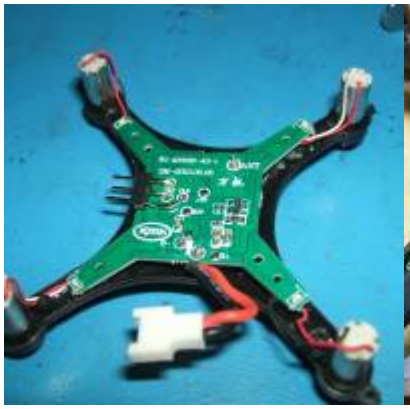
Gallery of awesome pictures

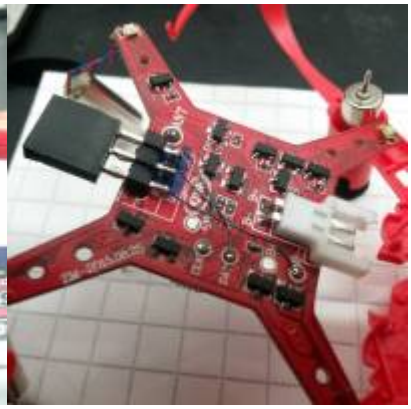
Note: the board pads are not designed for mechanical support, it's best to use a wire size that will break before the pad will. Attaching a solid part to the pad with no other support can result in the pad ripped from the board after a crash.

Flashing port examples

Male 2.54cm header.

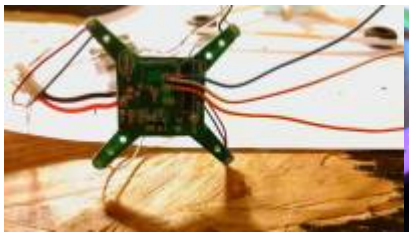


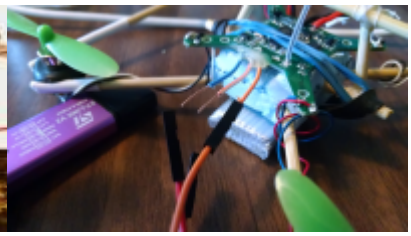
Female 2.54cm header.



Picoblade connector.

Solid wire (24gauge?).





CG023 FC with silverxxx firmware on a 110mm brushless quad

h8s-3d, using a 2mm round pin female micro connector

the final photo also shows power lead out for akk bs2 camera (whoopin' it up !)
